Technical reading and writing

Hevert David Gelis Díaz

Frontend Developer · React · React Native · Next.js

Frontend developer with 5+ years shipping web and mobile apps to production. I've migrated full products to React Native and shipped them to the App Store and Google Play, and worked on apps used by millions of people, such as Chedraui (5M+ downloads). I have a solid backend foundation with Node.js, NestJS and databases, and I also build products for businesses: booking systems, online stores and management systems.

EXPERIENCE

Frontend Developer Analyst
Nov 2024 – Present

Hypernova Labs → client Cochez y Cía · Panama (remote)

- Assigned to Cochez y Cía, a 100+ year-old Panamanian leader in construction materials, finishes and hardware.
- Migrated the **Aludra Ventas Asistidas** app from native Java (class-based components) to **React Native**, feature by feature: catalog by department, voice and camera search, customers, quotes, price-tag printing and a paint tinting configurator.
- Shipped the app to the **App Store and Google Play**; sales staff use it on the store floor.
- Production support and new features alongside product and design.

↗ App Store · Google Play: Aludra Ventas Asistidas

Semi-Senior Frontend Developer
May 2024 – Oct 2024

ADO Technologies (Scanovate) · Bogotá

- Full migration of the **dashboard** for a digital identity and compliance platform for financial services: customer enrollment, identity verification and fraud detection.
- Six-month project, delivered in full and live in production.
- Reusable components and UI/UX improvements with design and backend teams.

Mid Frontend Developer
Oct 2022 – May 2024

ITG Globers · Bogotá

- **Chedraui** (Mexico, 5M+ downloads, 4.2★): built the login and home screens of the online supermarket app.
- **Pepe Ganga** (Colombia): integrated online payments through the shopping app's payment gateway.
- Web and mobile features for **Bancolombia** and **App Morado** on REST APIs, focused on performance and UX.
- Multi-country agile teams with GitFlow, code review and Jira.

Frontend Developer

Feb 2021 – Oct 2022

Sigefi

- Built the **entire frontend of SIGEFI**, an invoicing and inventory SaaS for businesses in Colombia.
- Modules for e-invoicing (DIAN), cash registers and audits, customers, suppliers, inventory ledger, reports, branches and warehouses.
- API integration, deployment and production support.
